Redirect an Email to a Folder
You can create a rule that will send any email to a folder in Outlook as soon as it arrives.

You can then view all the emails in the folder together.

Create Rule
Right mouse click an email that you want to create a rule for and select Rules and Create Rule.

Choose Options
Select the ‘sent to’ option
Select the ‘move the item to folder’ option

In the folder list, either select an existing folder or create a new one.

View email in folder
All new emails to the selected email address will then be automatically re-directed to your chosen folder.
