Spiritual Care Education Standard
Core Spiritual Care Competences Undergraduate Nursing/Midwifery Students

Preamble

Introduction
This EPICC Spiritual Care Education Standard describes the spiritual care competences expected from undergraduate nursing and midwifery students. For every competence, the learning outcomes are described in aspects of knowledge, skills and attitudes. These competences are based on studies on spiritual care competences, which were discussed and agreed upon during the EPICC Teaching & Learning Event. It should be considered that these competences are founded in a person-centred and reflective attitude of openness, presence and trust, that is fundamental for nursing and midwifery as a whole.

Spirituality
EPICC has adopted the European Association for Palliative Care (EAPC) definition of spirituality and an adapted version of its definition of spiritual care (to reflect wellbeing as well as illness), which were derived from international consensus work in palliative care.

Spirituality:
“The dynamic dimension of human life that relates to the way persons (individual and community) experience, express and/or seek meaning, purpose and transcendence, and the way they connect to the moment, to self, to others, to nature, to the significant and/or the sacred.”

The spiritual field is multidimensional:
1. Existential challenges (e.g., questions concerning identity, meaning, suffering and death, guilt and shame, reconciliation and forgiveness, freedom and responsibility, hope and despair, love and joy).
2. Value-based considerations and attitudes (e.g., what is most important for each person, such as relations to oneself, family, friends, work, aspects of nature, art and culture, ethics and morals, and life itself).
3. Religious considerations and foundations (e.g., faith, beliefs and practices, the relationship with God or the ultimate).
**Spiritual care**
Care ‘which recognises and responds to the needs of the human spirit when faced with life-changing events (such as birth, trauma, ill health, loss) or sadness, and can include the need for meaning, for self-worth, to express oneself, for faith support, perhaps for rites or prayer or sacrament, or simply for a sensitive listener. Spiritual care begins with encouraging human contact in compassionate relationship and moves in whatever direction need requires’ (adapted from 4).

**Cultural context**
The content and application of the EPICC Spiritual Care Education Standard should be considered within the cultural context and the language of the country in which it is used. For that purpose, on a national level, parts of the Standard can be amended without losing its fundamental content.

**Terminology**
Throughout the EPICC Spiritual Care Education Standard, the terms ‘person and individual’ is used. These terms refer to the ‘patient’, ‘client’, ‘service user’, ‘pregnant woman’, ‘carer’, ‘family member’, ‘relative’ and so on, depending on the country in which the Standard is used, along with the local context.

1 These studies are:

<table>
<thead>
<tr>
<th>COMPETENCE</th>
<th>KNOWLEDGE (COGNITIVE)</th>
<th>SKILLS (FUNCTIONAL)</th>
<th>ATTITUDE (ETHICAL)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1</strong> INTRAPERSONAL SPIRITUALITY</td>
<td>Is aware of the importance of spirituality on health and well-being. <strong>KNOWLEDGE (COGNITIVE)</strong>: Understands the concept of spirituality. Can explain the impact of spirituality on a person’s health and well-being across the lifespan for oneself and others. Understands the impact of one’s own values and beliefs in providing spiritual care. <strong>SKILLS (FUNCTIONAL)</strong>: Reflects meaningfully upon one’s own values and beliefs and recognises that these may be different from other persons’. <strong>ATTITUDE (ETHICAL)</strong>: Willing to explore individuals’ personal, religious and spiritual beliefs. Is open and respectful to persons’ diverse expressions of spirituality.</td>
<td><strong>INTERPERSONAL SPIRITUALITY</strong> Engages with persons’ spirituality, acknowledging their unique spiritual and cultural worldviews, beliefs and practices. <strong>KNOWLEDGE (COGNITIVE)</strong>: Understands the ways that persons express their spirituality. Is aware of the different world/religious views and how these may impact upon persons’ responses to key life events. <strong>SKILLS (FUNCTIONAL)</strong>: Recognises the uniqueness of persons’ spirituality. Interacts with, and responds sensitively to the person’s spirituality. <strong>ATTITUDE (ETHICAL)</strong>: Is trustworthy, approachable and respectful of persons’ expressions of spirituality and different world/religious views.</td>
<td><strong>SPIRITUAL CARE: ASSESSMENT AND PLANNING</strong> Assesses spiritual needs and resources using appropriate formal or informal approaches, and plans spiritual care, maintaining confidentiality and obtaining informed consent where necessary. <strong>KNOWLEDGE (COGNITIVE)</strong>: Understands the concept of spiritual care. Is aware of different approaches to spiritual assessment. <strong>SKILLS (FUNCTIONAL)</strong>: Conducts and documents a spiritual assessment to identify spiritual needs and resources. Collaborates with other professionals. <strong>ATTITUDE (ETHICAL)</strong>: Is open, approachable and non-judgemental. Has a willingness to contain and ‘hold’ emotions.</td>
